Sitezy.ai: AI-Driven Multi-Tenant Platform for Intelligent Website Generation and Optimization

Group Members

Roll No: 15 **Name:** Manaswi Kabadi

Roll No: 20 **Name:** Atharva Lotankar

Roll No: 29 **Name:** Ronit Sahoo

Roll No: 30 **Name:** Shakti Sankpal

Mentor:

Mrs. Kajal Joseph

INFORMATION TECHNOLOGY DEPARTMENT

VISION:

To foster innovation, ethics, and lifelong learning in the field of Information Technology, shaping global professionals and leaders for sustainable development.

MISSION:

1. Deliver holistic, learner-centric IT education with societal relevance.
2. Drive research, innovation, and entrepreneurship through collaboration.
3. Uphold ethical, sustainable, and inclusive technology practice.
4. Shape globally competent professionals with skills and lifelong learning.

Program Outcome:

PO1	Engineering Knowledge: Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop the solution of complex engineering problems.
PO2	Problem Analysis: Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)
PO3	Design/Development of Solutions: Design creative solutions for complex engineering problems and design / develop systems /components / processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)
PO4	Conduct Investigations of Complex Problems: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).
PO5	Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)
PO6	The Engineer and The World: Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).
PO7	Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)
PO8	Individual and Collaborative Team work: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.
PO9	Communication: Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences
PO10	Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.
PO11	Life-Long Learning: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change.
PSO 1	**Computing & Emerging Technology:** Apply core computing and modern technologies, such as AI, Cloud Computing, IoT, cybersecurity, and data-driven tools, to build efficient and innovative solutions.
PSO 2	**Professionalism, Research & Innovation :** Exhibit professional ethics, teamwork, and research capabilities to create innovative and sustainable technological solutions.

Course Outcomes

Course Outcomes: After successful completion of the course students will be able to:		**BL**	**PI**
1	Identify and define a real-world engineering problem and apply knowledge of computing and engineering fundamentals to propose an appropriate solution.	L3	PI1.2
2	Conduct a systematic literature review and analyze existing solutions to justify the problem statement, objectives, and scope of the project.	L4	PI2.1 PI2.2 PI2.3
3	Elicit and analyze functional and non-functional requirements and prepare a formal problem specification and project plan.	L4	PI3.1
4	Design a high-level system architecture and select appropriate tools, technologies, and methodologies considering technical, societal, and environmental constraints.	L6	PI4.1 PI4.3
5	Work effectively in a team to prepare and present a professional project proposal, design documents, and reviews using appropriate technical communication.	L6	PI5.1 PI5.3
6	Demonstrate awareness of ethical, legal, and professional responsibilities relevant to the proposed project.	L2	PI6.1

Week/Date	Work Done	Mentor's Remark	Sign of Mentor
Week 1 (10/08/26 – 16/08/26)	Referred to all the feedback which was given to us in semester VI and made improvements according. UI changes, improved SEO model, added more templates for a variety in theme, etc. took place.		
Week 2 (17/08/26 – 23/08/26)	Showed all the revisions made to the project to the panel in Review 1.		
Week 3 (24/08/26 – 30/08/26)	Planned to implement the new prompt feature which was given to us as feedback in the review and also resolved other trivial bugs.		
Week 4 (31/08/26 – 06/09/26)	Refined both the springer and the IEEE research paper for Sitezy.ai and applied to many different conferences.		
Week 5 (07/09/26 – 13/09/26)	Started the documentation process for block diagram copyright for Sitezy.ai.		
Week 6 (14/09/26 – 20/09/26)	Created all the required documents which are needed for copyright and applied for the copyright on the government portal.		
Week 7 (21/09/26 – 27/09/26)	Posted all the required documents to the Copyright Office in Dwarka, New Delhi via Speed Post for the application process to move to the next stage.		

Week 8 (28/09/26 – 04/10/26)	Research paper was accepted at the 2026 ITI conference. All the reviewer's comments were reviewed and changes were planned to be made to the paper.		
Week 9 (05/10/26 – 11/10/26)	Made all the changes that were needed to the research paper according to the reviewer's comments which were given to us.		
Week 10 (12/10/26 – 18/10/26)	Also, the new prompt feature which was given to us as feedback in the first review was completed and improved. Also, our IEEE paper got accepted at ICCWN 2026.		
Week 11 (19/10/26 – 24/10/26)	Documentation, payment and other proceedings related to the ITI conference was made here and our paper was submitted to the conference with all the changes. Also created and completed the first black book draft.
